PRESS RELEASE

Reuters/Ipsos: Trump's Coattails (04/05/2021)

About the Study

These are some of the findings of an Ipsos poll conducted between March 30-31, 2021 on behalf of Thomson Reuters. For this survey, a sample of 1,005 Americans age 18+ from the continental U.S., Alaska and Hawaii were interviewed online in English. The sample includes 451 Democrats, 379 Republicans, and 119 independents. Weighting was then employed to balance demographics to ensure that the sample's composition reflects that of the adult population according to Census data and to provide results intended to approximate the sample universe. The precision of Ipsos online polls is measured using a credibility interval. In this case, the poll is accurate to within ± 3.5 percentage points, 19 times out of 20, had all Americans been polled. The credibility interval will be wider among subsets of the population. All sample surveys and polls may be subject to other sources of error, including, but not limited to coverage error, and measurement error. The poll also has a credibility interval ± 5.3 percentage points for Democrats, ± 5.7 percentage points for Republicans, and ± 10.2 percentage points for independents.
